COOPERATIVE EXTENSION UNIVERSITY OF CALIFORNIA

This information is provided by Cooperative Extension, an educational agency of the University of California and the United States Department of Agriculture. Support for Cooperative Extension is supplied by federal, state, and county governments. Cooperative Extension provides the people of California with the latest scientific information in agriculture and family consumer sciences. It also sponsors the 4-H Youth Program. Cooperative Extension representatives, serving 56 counties in California, are known as farm, home or youth advisors. Their offices usually are located in the county seat. They will be happy to provide you with information in their field of work.

The University of California's Cooperative Extension programs are available to all, without regard to race, color, or national origin. Issued in furtherance of Cooperative Extension work, acts of May 8 and June 30, 1914, in cooperation with the United States Department of Agriculture. James B. Kendrick, Jr., Director, Cooperative Extension, University of California.

INTRODUCTION

This Weed Science Training Aid has been prepared to provide persons interested in weed science with an index to the array of common and trade names of herbicides.

To avoid confusion between products the accepted common names of pesticides are nearly always used by state and federal regulatory agencies. In some instances the chemical name is given as well. University Weed Control Guides and Training Aids similarly use the common names of herbicides accepted by the Weed Science Society of America. When not too numerous to list, registered trade names are also included in University publications.

Example of common, chemical, and registered trade names:

WSSA common name	2,4-D
Chemical name:	(2,4-dichlorophenoxy) acetic acid
Registered trade name:	Formula 40

Chemical names are omitted since they are seldom used. For the chemical name of an herbicide, consult the registrant or the Herbicide Handbook of the Weed Science Society of America, Fourth Edition, 1979.

No endorsement by the University of California is intended of listed products nor is criticism intended of those products not listed.

For this first revision the available formulations for each product have been added. The abbreviations used for the basic types of formulations are as follows:

WATER SOLUBLE PRODUCTS -

W.S.P.	Water soluble powder
W.S.C.	Water solution concentrate

OIL SOLUBLE PRODUCTS -

E.C.	Emulsifiable concentrate
O.S.C.	Oil soluble concentrate (non-emulsifiable)

SUSPENDABLE PRODUCTS -

W. P.	Wettable powder, pelleted wettable powder
Slr.	Slurry ("flowable") including water dispersible liquid (W.D.L.)

GRANULAR PRODUCTS -

G.	Granular, pelleted

GAS — Gas, fumigant
